PUBLIC SERVICE COMMISSION OF WISCONSIN

In the Matter of Prescribing a Uniform System)

Utilities)

ORDER ADOPTING UNIFORM SYSTEM OF ACCOUNTS

THE COMMISSION FINDS:

By order dated January 18, 1962, in docket 2-U-902 this commission adopted and prescribed for use by the Class A and Class B Telephone Companies under its jurisdiction the Uniform System of Accounts (USOA) for Class A and Class B Telephone Companies issued by the Federal Communications Commission (FCC) together with such amendments as the FCC may subsequently prescribe unless this commission shall otherwise direct. This commission by supplemental orders in docket 2-U-902 dated May 12, 1964; August 11, 1970; December 3, 1971; January 24, 1972; October 17, 1974; February 19, 1975; July 11, 1976; February 14, 1980; June 25, 1981; August 26, 1983; December 20, 1983; and August 29, 1985, prescribed amendments to this system of accounts issued by the FCC.

On May 15, 1986, the FCC released its order in FCC docket 78-196 wherein it ordered that Part 31 of the Uniform System of Accounts for Class A and Class B Telephone Companies be replaced with a single new Uniform System of Accounts entitled Part 32, Uniform System of Accounts for Telephone Companies.

With the introduction of competition and new products, the FCC feels that the telecommunications industry has changed dramatically since parts 31 and 33 were first developed. The original accounting system was established in 1935 and was not flexible enough in regulating a rapidly changing telecommunications industry.

The USOA as written by the FCC classifies companies into two classes: Class A are those companies having annual revenues from regulated telecommunications operations of \$100,000,000 or more; Class B are those companies having annual revenues from regulated telecommunications operations of less than \$100,000,000. There would no longer be a Class C classification.

The new USOA is a financial-based accounting system flexible enough to permit further expansion. It has a two-dimensional matrix concept. This means that expenses would be classified by both purpose and type. The income statement and balance sheet are disaggregated and realigned to reflect products and services and, to the extent that regulatory considerations would permit, would accommodate generally accepted accounting principles (GAAP). The new USOA, to be more consistent with GAAP, would expense rather than capitalize a portion of indirect costs as incurred.

The commission staff met on numerous occasions with representatives of the Wisconsin State Telephone Association (WSTA) and also met individually with both Wisconsin Bell, Inc. (WBI) and GTE MTO, Inc. (GTE) to discuss the Uniform System of Accounts Rewrite (USOAR).

If this commission adopted the FCC system of classification, only WBI and GTE would be classified as Class A. The remaining telecommunications

companies would be classified as Class B. Therefore, this commission will establish two classes as follows: Class A companies are those companies having 7,500 or more access lines or affiliated with a holding company having a combined total of 7,500 or more access lines. Class B companies are those companies having less than 7,500 access lines.

This commission considers the level of detail in Part 32 for Class B companies as prescribed by the FCC to be inadequate in enabling this commission to meet its regulatory duties as prescribed in Chapter 196, Wis. Stats. Therefore, this commission considers it reasonable to increase the level of detail of the Class B USOA to at least maintain the current level of detail that is available under Part 31 of the USOA.

One example of the lack of detail in the FCC prescribed Class B accounts is in the telecommunications plant accounts in service area. Here the FCC prescribes eight accounts for Class B. This commission considers it reasonable that the Class B companies maintain the same plant accounts as those prescribed for Class A.

This commission considers it necessary that both Class A and Class B companies maintain accounting detail that will support matrix expense classifications; however, except for companies subject to FCC jurisdiction, actual ledger accounts for the expense matrix are not required. The accounting records underlying the matrix categories shall be maintained in such detail that the total of the amounts distributed and the distribution is readily identified and available for audit and reporting purposes.

The FCC prescribes tax normalization to all book/tax timing differences which would be considered material for published financial report purposes. This commission has historically used tax normalization for the book/tax timing differences resulting from the use of accelerated depreciation for tax purposes following the Wisconsin method where tax savings will be recorded as depreciation expense. All other book/tax timing differences were flowed through. This commission will continue to use tax normalization in this manner.

This commission adopts Part 32 set forth in FCC docket 78-196 with certain amendments as set forth in the attached appendix. Any revision or amendments as made or adopted by the FCC subsequent to the issue date of this order will not be effective for Wisconsin jurisdictional purposes without order by this commission.

Conclusion of Law

THE COMMISSION CONCLUDES:

That it has jurisdiction under s. 196.06, Wis. Stats., to prescribe and amend uniform accounting systems for those utilities subject to its jurisdiction.

Order

THE COMMISSION THEREFORE ORDERS:

1. That the Uniform System of Accounts for Class A and Class B Telephone Utilities as prescribed, revised and amended on various dates by the commission in docket U-2-902 is hereby rescinded effective December 31, 1987.

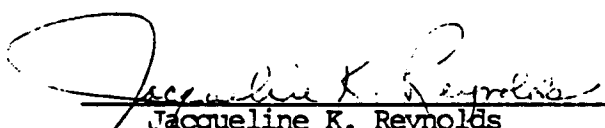

2. That the Uniform System of Accounts for Class C Telephone Utilities as prescribed, revised and amended on various dates by this commission in docket 2-U-1041 is hereby rescinded effective December 31, 1987.

3. That the Uniform System of Accounts as prescribed by the Federal Communications Commission and amended as set forth in the attached Appendix is adopted by the commission effective January 1, 1988. Any revision or amendments as made or adopted by the FCC subsequent to the issue date of this order will not be effective for Wisconsin jurisdictional purposes without order by this commission.

AFUDC shall be charged to Account 2003, Telecommunications Plant Under Construction, and credited to Account 7340. The rate for calculating AFUDC shall be determined as follows: If financing plans associate a specific new borrowing with an asset, the rate on that borrowing may be used for the asset; if no specific new borrowing is associated with an asset or if the average accumulated expenditures for the asset exceed the amounts of specific new borrowing associated with it, the capitalization rate to be applied to such excess shall be a weighted average of the rates applicable to other borrowing of the enterprise. The amount of interest cost capitalized in an accounting period shall not exceed the total amount of interest cost incurred by the company in that period.

~~(x) "Allowance for funds used during Construction" includes the cost of debt and equity funds used in the construction of telecommunications property and shall be applied to telecommunications property to be completed in over one year as described in Section 32.2004 of this subpart. No interest during construction shall be accrued on telecommunication property to be completed in one year or less, as described in paragraph 2003 unless specifically authorized by this commission. Allowance for funds used during construction shall be charged to the accounts appropriate for the cost of the property acquired or constructed as follows:

(A) Reasonable amounts of interest during the construction period (before the property is received or is completed ready for telecommunications service) on general funds expended for any acquisition or construction of telecommunications plant shall be computed on amounts in Account 2004, Telecommunications Plant Under Construction - Long Term and shall be charged thereto. Such amounts shall be credited to Account 7340, Allowance For Funds Used During Construction.

(B) When funds, derived from the sales of bonds, notes and other interest-bearing debt, are specifically acquired and separately held for use in the construction of telecommunications plant, the total interest, discount or premium shall be included in the cost of telecommunications plant and credited to Account 7340, Allowance For Funds Used During Construction; provided, however, that no interest charge for a period longer than six months prior to the commencement of construction work shall be made unless specifically authorized by the commission.

No allowance for funds used during construction charge shall be included in these accounts on expenditures for construction projects which have been abandoned.

(D) No amount of allowance for funds used during construction shall be accrued retroactively for any telecommunications plant which was once included in Account 2003, Telecommunications Plant Under Construction - Short Term. No reversal of allowance for funds used during construction is necessary for plant included in Account 2004, but completed in less than one year.

(xi) "Insurance" includes premiums paid specifically for protection against loss and damage in connection with the construction of telecommunications plant due to fire or other casualty, injury to or death of employees or others, damages to property of others, defalcations of employees and agents and the non-performance of contractual obligations of others.

(xii) "Construction services" include the cost of telephone, electricity, power, construction quarters, office space and equipment directly related to the construction project.

(xiii) "Indirect construction costs" shall include indirect costs such as general engineering, supervision and support. Such costs, in addition to direct supervision, shall include indirect plant operations and engineering supervision up to, but not including, supervision by executive officers whose pay and expenses are chargeable to Account 6711, Executive. The records supporting the entries for indirect construction costs shall be kept so as to show the nature of the expenditures, the individual jobs and accounts charged, and the bases of the distribution. The amounts charged to each plant account for indirect costs shall be readily determinable. The instructions contained herein shall not be interpreted as permitting the addition to plant of amounts to cover indirect costs based on arbitrary allocations.

(xiv) The cost of construction shall not include any amounts classifiable as Corporate Operations Expense.

(d) Telecommunications Plant Retired

(1) Telecommunications plant accounts shall at all times disclose the original cost of all property in service. When any item of property subject to plant retirement accounting is worn out, lost, sold, destroyed, abandoned, surrendered upon lapse of title, becomes permanently unserviceable, is withdrawn or for any other reason is retired from service, the plant accounts applicable to that item shall be credited with the original cost of the plant retired whether replaced or not (except as provided for minor items in paragraph (d)2(ii) of this section). Normally, these retirement credits with respect to such plant as entire buildings, entire central offices, all plant abandoned and any large sections of plant withdrawn from service, shall be entered in the accounts for the month in which use of the property ceased. For any other plant withdrawn from service, the retirement credits shall be entered no later than the next succeeding month. Literal compliance with the provision for timing of entries with respect to property amounting to less than \$50,000 retired under any one project is not required if an unreasonable amount of recordkeeping and estimating of quantities, original costs and salvage is necessary. The retirement entry shall refer to the continuing property record, or records supplemental thereto, from which the cost was obtained (note also paragraph (d)(3) of this section.) Every company shall establish procedures which will ensure compliance with these requirements.

(2) To avoid undue refinement, depreciable telecommunications plant shall be accounted for as follows:

(i) Retirement units: This group includes major items of property, a representative list of which shall be prescribed by this commission. In lieu of the retirement units prescribed with respect to a particular account, a company may, after obtaining specific approval by this commission, establish and maintain its own list of retirement units for a portion or all of the plant in any such account. For items included on the retirement units list, the original cost of any such items retired shall be credited to the plant account

and charged to Account 3100, Accumulated Depreciation, whether or not replaced. The original cost of retirement units installed in place of property retired shall be charged to the applicable telecommunications plant account.

(ii) Minor items: This group includes any part or element of plant which is not designated as a retirement unit. The original cost of a minor item of property when included in the specific or average cost for a retirement unit or units requires no separate credit to the telecommunications plant account when such a minor item is retired. The cost of replacement shall be charged to the account applicable for the cost of repairs of the property. However, if the replacement effects a substantial betterment (the primary aim of which is to make the property affected more useful, of greater durability, of greater capacity or more economical in operation), the excess cost of such a replacement, over the estimated cost at the then current prices of replacement without betterment of the minor items being retired, shall be charged to the applicable telecommunications plant account.

(3) The cost of property to be retired shall be the amount at which property is included in the telecommunications plant accounts. However, when it is impracticable to determine the cost of each item due to the relatively large number or small cost of such items, the average cost of all the items covered by an appropriate subdivision of the account shall be used in determining the cost to be assigned to such items when retired. The method used in determining average cost must give due regard to the quantity, vintage, size and kind of items, the area in which they were installed and their classification in other respects. Average cost may be applied in retirement of such items as poles, wire, cable, cable terminals, conduit and booths. Any company may use average cost of property installed in a year or band of years as approved by the commission. It should be understood, however, that the use of average costs shall not relieve the company of the requirement for maintaining its continuing property records to show, where practicable, dates of installation and removal for purposes of mortality studies. (See paragraph 32.2000(f) of this subpart), Standard Practices for Establishing and Maintaining Continuing Property Records.)

(4) The accounting for the retirement of property, plant and equipment shall be as provided above except:

(i) Amounts included in Account 2005, Telecommunications Plant Adjustment; Account 2680, Amortizable Tangible Assets; Account 2681, Capital Leases; Account 2682, Leasehold Improvements; Account 2690, Intangibles; and any amounts associated with amortizable leaseholds, easements, and similar rights in land included in Account 2111, Land, shall be debited, as appropriate, to Accounts 3400, 3410, 3420, 3500, or 3600, and credited to the applicable accounts.

(ii) Amounts in Account 2111, Land, and amounts for works of art recorded in Account 2122, Furniture, shall be treated at disposition as a gain or loss and shall be credited or debited to Account 7150, Gains and Losses from Disposition of Land and Artwork, as applicable. If land or artwork is retained by the company and held for sale, the cost shall be charged to Account 2006, Nonoperating Plant.

(5) When the telecommunications plant is sold together with traffic associated therewith, the original cost of the property shall be credited to the applicable plant accounts and the estimated amounts carried with respect thereto in the accumulated depreciation and amortization accounts shall be charged to such accumulated accounts. The difference, if any, between the net amount of such debit and credit items and the consideration received (less commissions and other expenses of making the sale) for the property shall be included in Account 7350, Gains and Losses from Disposition of Certain Property. The accounting for depreciable telecommunications plant sold without the traffic associated therewith shall be in accordance with the accounting provided in paragraph 3100(c) of this subpart.

(e) Basic Property Records

(1) The basic property records are that portion of the total property accounting system which preserves the following detailed information:

- (i) The identity, vintage, location and original cost of units of property;
- (ii) Original and ongoing transactional data (plant account activity) in terms of such units; and
- (iii) Any other specific financial and cost accounting information not properly warranting separate disclosure as an account or subaccount but which is needed to support regulatory, cost, tax management and other specific accounting information needs and requirements.

See Rev. 1/1/93
~~(2) The basic property records must be (i) subject to internal accounting controls, (ii) auditable, (iii) equal in the aggregate to the total investment reflected in the financial property control accounts as well as the total of the cost allocations supporting the determination of cost-of-service at any particular point in time, and (iv) maintained throughout the life of the property.~~

(3) The basic property records shall consist of (i) continuing property records and (ii) records supplemental thereto which together reveal clearly, by accounting area, the detailed and systematically summarized information necessary to meet fully the requirements of paragraphs (e) (1) and (e) (2) of this section.

(4) Companies shall establish and maintain basic property records for each class of property recorded in the several plant accounts which comprise the balance sheet Account 2001, Telecommunications Plant In Service, Account 2002, Property Held for Future Telecommunications Use, and Account 2006, Nonoperating Plant.

(5) The company shall notify the commission of a plan for the basic property record as follows:

- (i) Not later than June 30 of the year following that in which it becomes subject to this system of accounts, the company shall file with the

(e)(2). The ~~basic basis~~ property records must be (i) subject to internal accounting controls, (ii) auditable, (iii) equal in the aggregate to the total investment reflected in the financial property control accounts as well as the total of the cost allocations supporting the determination of cost-of-service at any particular point in time, and (iv) maintained throughout the life of the property.

(e)(7)(i) The continuing property records shall be compiled on the basis of original cost (or other book cost consistent with this system of accounts). The continuing property records shall be maintained as prescribed in paragraph 32.2000 (f)(2)(iii) of this subpart in such manner as will meet the following basic objectives:

(f)(5) Identification of Property Record Units

There shall be shown in the continuing property record or in record supplements thereof, a complete description of the property records units in such detail as to identify such units. The description shall include the identification of the work order under which constructed, the year of installation (unless not determinable per paragraph 32.2000 (f)(4) of this subpart), specific location of the property within each accounting area in such manner that it can be readily spot-checked for proof of physical existence, the accounting company's number or designation, and any other description used in connection with the determination of ~~ex~~ the original cost. Descriptions of units of similar size and type shall follow prescribed groupings.

commission two (2) copies of a complete plan of the method to be used in the compilation of a basic property record with respect to each class of property. The plan shall include a list of proposed accounting areas accompanied by description of the boundaries of each area as defined in accordance with the requirements of paragraphs 32.2000(f)(1)(i) and (ii) of this subpart. The plan shall also include a list of property record units proposed for use under each regulated plant account. These property record units shall be selected such that the requirements of paragraphs 32.2000(f)(2)(i), (ii) and (iii) of this subpart be satisfied.

(ii) The company shall submit to the commission one copy of any major proposed changes in its basic property record plan at least 30 days before the effective date of the proposed changes.

(6) The company shall prepare and maintain the basic property record as follows:

(i) Not later than June 30 of the year following that in which the company becomes subject to this system of accounts, begin the preparation of a basic property record.

(ii) Complete within two years of the prescribed beginning date, basic property records for all property as of the end of the preceding calendar year.

(iii) Promptly process in the basic property records all property changes affecting periods subsequent to initial establishment of the basis property record.

(7) The basic property record components (see paragraph (c) of this section) shall be arranged in conformity with the regulated plant accounts prescribed in this system of accounts as follows:

*See
Rev.
1/1/93*
~~(i) The continuing property records shall be compiled on the basis of original cost (or other book cost consistent with this system of accounts). The continuing property records shall be maintained as prescribed in paragraph 32.2000(f)(2)(iii) of this subpart in such manner as will meet the following basic objectives:~~

- ~~(A) Provide for the verification of property record units by physical examination.~~
- ~~(B) Provide for accurate accounting for retirements.~~
- ~~(C) Provide data for use in connection with depreciation studies.~~

(ii) The records supplemental to the continuing property records shall disclose such service designations, usage measurement criteria, apportionment factors, or other data as may be prescribed by the commission in this Part or other Parts of its Rules and Regulations. Such data are subject to the same general controls and standards for auditability and support as are all other elements of the basic property records.

(f) Standard Practices for Establishing and Maintaining Continuing Property Records

(1) Accounting Area

(i) The continuing property record, as related to each primary plant account, shall be established and maintained by subaccounts for each accounting area. An accounting area is the smallest territory of the company for which accounting records of investment are maintained for all plant accounts within the area. Areas already established for administrative, accounting, valuation, or other purposes may be adopted for this purpose when appropriate. In no case shall the boundaries of accounting areas cross either State lines or boundaries prescribed by the commission.

(ii) In determining the limit of each area, consideration shall be given to the quantities of property, construction conditions, operating districts, county and township lines, taxing district boundaries, city limits, and other political or geographical limits, in order that the area adopted may have maximum adaptability, within the confines of practicability, for both the company's purpose and those of Federal, State, and municipal authorities.

(2) Property Record Units

(i) In each of the established accounting areas, the "property record units" which are to be maintained in the continuing property record shall be set forth separately, classified by size and type with the amount of original cost (or other appropriate book cost) associated with such units. When a list of property record units has been accepted by the commission, they shall become the units referred to in this statement of standard practices. Such units shall apply to only the regulated portion of this system of accounts.

(ii) When it is found necessary to revise this list because of the addition of units used in providing new types of service, or new units resulting from improvements in technology, or because of the grouping or elimination of units which no longer merit separate recognition as property record units, one copy of such changes shall be submitted to the commission. Upon appropriate showing by the company, the commission may specifically exempt the company from these filing requirements.

(iii) The continuing property record shall reveal the description, location, date of placement, the essential details of construction, and the original cost (note also paragraph 32.2000(f)(3) of this subpart) of the property record units. The continuing property record and other underlying records of construction costs shall be so maintained that, upon retirement of

one or more retirement units or of minor items without replacement when not included in the costs of retirement units, the actual cost or a reasonably accurate estimate of the cost of the plant retired can be determined.

(3) Methods of Determining Original Cost of Property Record Units

The original cost of the property record units shall be determined by analyses of the construction costs incurred as shown by completion reports and other data, accumulated in the respective construction work orders or authorizations. Costs shall be allocated to and associated with the property record units to facilitate accounting for retirements. The original cost of property record units shall be determined by unit identification or averaging as described below:

(i) Unit Identification

Cost shall be identified and maintained by specific location for property record units contained within certain regulated plant accounts or account groupings such as Land, Buildings, Central Office Assets, Motor Vehicles, Garage Work Equipment, and Furniture. In addition, units involved in any unusual or special type of construction shall be recorded by their specific location costs (note also paragraph 32.2000(f) (3) (ii) (B) of this subpart.

(ii) Averaging

(A) Average costs may be developed for plant consisting of a large number of similar units such as terminal equipment, poles, wire, cable, cable terminals, conduit, furniture, and work equipment. Units of similar size and type within each specified accounting area and regulated plant account may be grouped. Each such average cost shall be set forth in the continuing property record of the units with which it is associated.

(B) The averaging of costs permitted under the provisions of the foregoing paragraph is restricted to plant installed in a particular vintage or band of years incurred within an accounting area. This paragraph does not permit the inclusion of the cost of units involved in any unusual or special type of construction. The units involved in such unusual or special type of construction shall be recorded at cost by location.

(4) Estimates

In cases where the actual original cost of property cannot be ascertained, such as pricing an inventory for the initial entry of a continuing property record or the pricing of an acquisition for which a continuing property record has not been maintained, the original cost may be estimated. Any estimated original cost shall be consistent with the accounting practices in effect at the time the property was constructed.

(5) Identification of Property Record Units

See
Rev.
1/1/93

~~There shall be shown in the continuing property record or in record supplements thereof, a complete description of the property records units in such detail as to identify such units. The description shall include the identification of the work order under which constructed, the year of installation (unless not determinable per paragraph 32.2000(f)(4) of this subpart, specific location of the property within each accounting area in such manner that it can be readily spot-checked for proof of physical existence, the accounting company's number or designation, and any other description used in connection with the determination of the original cost. Descriptions of units of similar size and type shall follow prescribed groupings.~~

(6) Reinstalled units

When units to which average costs are not applied, i.e., specific and fixed location units, are removed or retired and subsequently reinstalled, the data when the unit was first charged to the appropriate plant account shall, when required for adequate service life studies and reasonably accurate retirement accounting, be shown in addition to the date of reinstallation.

(7) Age and Service Life of Property

The continuing property record shall disclose the age of existing property and the supporting records shall disclose the service life of property retired. Exceptions from this requirement for any property record unit shall be submitted to the commission for approval.

(8) Reference to Sources of Information

There shall be shown by appropriate reference the source of all entries. All drawings, computations, and other detailed records which support quantities and costs or estimated costs shall be retained as a part of or in support of the continuing property record.

(9) Jointly Owned Property

(i) With respect to jointly owned property, there shall be shown in the continuing property record or records supplemental thereto:

- (A) The identity of all joint owners.
- (B) The percentage owned by the accounting company.

(ii) When regulated plant is constructed under arrangements for joint ownership, the amount received by the constructing company from the other joint owner or owners shall be credited as a reduction of the gross cost of the plant in place.

(iii) When a sale of a part interest in regulated plant is made, the fractional interest sold shall be treated as a retirement and the amount received shall be treated as salvage. The continuing property record or records supplemental thereto shall be so maintained as to identify separately retirements of this nature from physical retirements of jointly owned plant.

(iv) If jointly owned regulated property is substantial in relation to the total of the same kind of regulated property owned wholly by the company, such jointly owned regulated property shall be appropriately segregated in the continuing property record.

(g) Depreciation Accounting

(1) Computation of Depreciation Rates

(i) Unless otherwise provided by the commission, either through prior approval or upon prescription by the commission, depreciation percentage rates shall be computed in conformity with a group plan of accounting for depreciation and shall be such that the loss in service value of the property, except for losses excluded under the definition of depreciation, may be distributed under the straight-line method during the service life of the property.

(ii) In the event any composite percentage rate becomes no longer applicable, revised composite percentage rates shall be computed in accordance with paragraph (g) (1) (i) of this section.

(iii) The company shall keep such records of property and property retirements as will allow the determination of the service life of property which has been retired, or facilitate the determination of service life indications by mortality, turnover, or other appropriate methods. Such records will also allow the determination of the percentage of salvage value and cost of removal for property retired from each class of depreciable plant.

(2) Depreciation Charges

(i) A separate annual percentage rate for each depreciation category of telecommunications plant shall be used in computing depreciation charges. If applicable, tax savings depreciation resulting from normalization accounting for tax differentials occurring from the use of accelerated depreciation for income tax purposes shall also be recorded in the depreciation expense and accumulated depreciation accounts. Normalization accounting for such item may be implemented only after receiving prior authorization from this commission. The company shall maintain a separate accumulated book depreciation subaccount for each depreciable plant account and plant subaccount. In addition, a separate accumulated tax savings depreciation subaccount for each depreciable plant account and plant subaccount shall be maintained.

(ii) Except where provisions of paragraph (g) (2) (iv) of this section or Wisconsin Statutes, Section 196.09(1) apply, companies upon receiving prior approval or certification by the Public Service Commission of Wisconsin shall apply such depreciation rate as will ratably distribute on a straight line basis 1) the original book cost of a class or subclass of plant and its

estimated net salvage during the known or estimated service life of the plant, or 2) the net book cost of a class or subclass of plant and its estimated net salvage over the known or estimated remaining service life of the plant, as determined by the Public Service Commission of Wisconsin.

(iii) Charges for currently accruing depreciation shall be made monthly to the appropriate depreciation accounts, and corresponding credits shall be made to the appropriate depreciation reserve accounts. Current monthly charges shall normally be computed by the application of one-twelfth of the annual depreciation rate to the monthly average balance of the associated category of plant. The average monthly balance shall be computed using the balance as of the first and last days of the current month.

(iv) In certain circumstances and upon prior approval of this commission, monthly charges may be determined in total or in part through the use of other methods whereby selected plant balances or portions thereof are ratably distributed over periods prescribed by this commission. Such circumstances could include but not be limited to factors such as the existence of reserve deficiencies or surpluses, types of plant that will be completely retired in the near future, and changes in the accounting for plant. Where alternative methods have been used in accordance with this subparagraph, such amounts shall be applied separately or in combination with rates determined in accordance with (g) (2) (ii) of this section.

(3) Acquired Depreciable Plant

When acquired depreciable plant carried in Account 1439, Deferred Charges, is distributed to the appropriate plant accounts, adjusting entries shall be made covering the depreciation charges applicable to such plant for the period during which it was carried in Account 1439.

(4) Plant Retired for Nonrecurring Factors not Recognized in Depreciation Rates

(i) A retirement will be considered as nonrecurring (extraordinary) only if the following criteria are met:

(A) The impending retirement was not adequately considered in setting past depreciation rates.

(B) The charging of the retirement against the reserve will unduly deplete that reserve.

(C) The retirement is unusual such that similar retirements are not likely to recur in the future.

(5) Upon direction or approval from this commission, the company shall credit Account 3100, Accumulated Depreciation, and Charge Account 1438, Deferred Maintenance and Retirements, with the unprovided-for loss in service value. Such amounts shall be distributed from Account 1438 to Account 6561, Depreciation Expense - Telecommunications Plant in Service, or Account 6562, Depreciation Expense - Property Held for Future Telecommunications Use, over such period as this commission may direct or approve.

(h) Amortization Accounting

(1) Unless otherwise provided by this commission, either through approval, or upon prescription by this commission, amortization shall be computed on the straight-line method, i.e., equal annual amounts shall be applied. The cost of each type of asset shall be amortized on the basis of the estimated life of that asset and shall not be written off in the accounting period in which the asset is acquired. A reasonable estimate of the useful life may be based on the upper or lower limits even though a fixed existence is not determinable. However, the period of amortization shall not exceed forty years.

(2) In the event any estimated useful life becomes no longer applicable, a revised estimated useful life shall be determined in accordance with paragraph (h) (1) of this section.

(3) Amortization charges shall be made monthly to the appropriate amortization expense accounts and corresponding credits shall be made to the appropriate amortization reserve accounts. Monthly charges shall be computed by the application of one-twelfth to the annual amortization amount.

(4) The company shall keep such records as will allow the determination of the useful life of the asset.

(i) Accounting for Software

The original cost of initial operating system software for computers shall be classified to the same account as the associated hardware whether acquired separately or in conjunction with the associated hardware.

The revenue accounts are intended to include the actual cash inflows (or equivalents) that have or will occur as a result of the company's ongoing major or central operations during the period. They will include the revenues which arise from furnishing regulated telecommunications services to others, from directory advertising, rentals of telecommunications assets and from providing other services which are directly associated with the provision of regulated telecommunications services.

(b) Deductions from Revenue

Corrections of overcharges, authorized refunds of overcollections previously credited to revenue, authorized refunds and adjustments on account of failure in service, and other corrections shall be charged to the revenue account previously credited with the amounts involved.

(c) Commissions

Commissions paid to others or employees in place of compensation or salaries for services rendered, such as public telephone commissions, shall be charged to Account 6623, Customer Services, and not to the revenue accounts.

(d) Revenue Recognition

When the billing cycle encompasses more than one accounting period, adjustments are necessary to properly recognize the revenue applicable to the current accounting period under report. Revenues recorded under the terms of two-tier contracts or other variable payment plans should be deferred, if necessary, and recognized ratably with expenses over the term of the related contract. Any amounts deferred shall be credited to Account 4360, Other Deferred Credits.

The charges and credits resulting from expense sharing or apportionment arrangements associated with the provision of regulated telecommunications services shall be recorded in the detailed regulated accounts. Charges and credits resulting from revenue settlement agreements or other revenue pooling arrangements associated with the provision of regulated telecommunications services shall be included in the appropriate revenue accounts. Those charges and credits resulting from contractual revenue pooling and/or sharing agreements shall be recorded in each prescribed revenue account and prescribed subsidiary record categories thereof to the extent that each is separately identifiable in the settlement process. Such subsidiary record categories shall be reported as required by Part 43 of the FCC's Rules and Regulations.

(3) Summary accounts within revenue groups shall be used to describe aggregations of two or more accounts having a certain commonality. They shall also include operating revenue derived from activities performed incident to the company's tariffed telecommunications operations which, though non-tariffed, are included in the regulatory process.

(l) Nonregulated Revenues

The nonregulated revenue account shall be used for nonregulated operating revenues when a nonregulated activity involves the common or joint use of assets or resources in the provision of regulated and nonregulated products or services and when such activity is accounted for as required in §32.23(c) of the FCC's USOA, within the accounts prescribed in this system for telephone company operations. Revenues from nontariffed activities offered incidental to tariffed services may be accounted for as regulated revenues provided the activities are outgrowths of regulated operations and the revenues do not exceed in the aggregate one percent of total revenues for three consecutive years. Such activities must be listed in the Commission-approved Cost Allocation Manual for any company required to file a Cost Allocation Manual.

Note A: Paragraph (l) is not adopted for those companies not subject to dual jurisdiction or not having an approved cost allocation manual; however, any Class A and B telephone utility subject to the jurisdiction of the FCC may elect to follow accounting prescribed by the FCC for this activity. A utility so electing shall report by identifying regulated and nonregulated amounts in the manner and at the times required by this commission.

SUBPART E INSTRUCTIONS FOR EXPENSE ACCOUNTS

- (a) ~~32.5999~~ Structure of the Expense Accounts

See
Rev. 1/1/93

SUBPART E INSTRUCTIONS FOR EXPENSE ACCOUNTS

§32.5999

(a) Structure of the Expense Accounts

(1) The expense section of the system of accounts shall be organized by expense group summary account, account, and subsidiary record category (if required).

(2) The expense section of this system of accounts shall be comprised of four major expense groups -- Plant Specific Operations, Plant Nonspecific Operations, Customer Operations and Corporate Operations. Expenses to be recorded in Plant Specific and Plant Nonspecific Operations Expense Groups generally reflect cost associated with the various kinds of equipment identified in the plant asset accounts. Expenses to be recorded in the Customer Operations and Corporate Operations accounts reflect the costs of, or are associated with, functions performed by people, irrespective of the organization in which any particular function is performed.

(3) Summary accounts within expense groups shall be used to describe aggregations of two or more accounts having a certain commonality. Summary accounts are assigned numbers so that they may be used by Class A telephone companies to aggregate accounts for reporting purposes; and as specifically directed, so that they may be used as accounts by Class B telephone companies.

(4) Accounts shall be maintained as prescribed in this section subject to the conditions described in paragraph 32.13 in Subpart B. Subsidiary record categories may be required below the account level by this system of accounts or by commission order.

(b) Plant Specific Operations Expense

(1) The Plant Specific Operations Expense accounts, 6110 through 6441, are used to record costs related to specific kinds of telecommunications plant.

(2) The Plant Specific Operations Expense accounts predominantly mirror the telecommunications plant in service detail accounts and are numbered consistently with them; the first digit of the expense account being six (6) and the remaining digits being the same as the last three numbers of the related plant account. In classifying Plant Specific Operations expenses, the text of the corresponding plant account should be consulted to ensure appropriateness.

(3) The Plant Specific Operations Expense accounts shall include the costs of inspecting, testing (except as specified in Account 6533, Testing Expense) and reporting on the condition of telecommunications plant to determine the need for repairs, replacements, rearrangements and changes; performing routine work to prevent trouble (except as specified in Account 6533), replacing items of plant other than retirement units; rearranging and changing the location of plant not retired; repairing material for reuse; restoring the condition of plant damaged by storms, floods, fire or other casualties (other than the cost of replacing retirement units); inspecting after repairs have been made; and receiving training to perform these kinds of work. Also included are the costs of direct supervision (immediate or first-level) and office support of this work.

(4) In addition to the activities specified in paragraph (b) (3) of this section, the appropriate Plant Specific Operations Expense accounts shall include the cost of personnel whose principal job is the operation of plant equipment, such as general purpose computer operators, aircraft pilots,

chauffeurs and shuttle bus drivers. However, when the operation of equipment is performed as part of other identifiable functions (such as the use of office equipment, capital tools or motor vehicles) the operators' cost shall be charged to accounts appropriate for those functions. (For costs of operator services personnel, see Accounts 6621, Call Completion Services, and 6622, Number Services, and for costs of test board personnel see Account 6533.)

(c) Plant Nonspecific Operations Expense

The Plant Nonspecific Operations Expense accounts shall include expenses related to property held for future telecommunications use, provisioning expenses, network operations expenses, and depreciation and amortization expenses. Accounts in this group (except for Accounts 6540, Access Expense, and Accounts 6560 through 6565) shall include the costs of performing activities described in narratives for individual accounts. These costs shall also include the costs of supervision and office support of these activities.

(d) Customer Operations Expense

The Customer Operations Expense accounts shall include the cost of performing customer related marketing and services activities described in narratives for individual accounts. These costs shall also include the costs of supervision, office support and training for these activities.

(e) Corporate Operations Expense

The Corporate Operations Expense accounts shall include the costs of performing executive and planning activities and general and administrative activities described in narratives for individual accounts. These costs shall also include the costs of supervision, office support and training for these activities.

(f) Expense Matrix

The expense accounts shall be maintained by the following subsidiary record categories, as appropriate to each account. Such subsidiary record categories shall be reported as required by Part 43 of the FCC's Rules and Regulations.

(1) Salaries and Wages

This subsidiary record category shall include compensation to employees, such as; wages, salaries, commissions, bonuses, incentive awards and termination payments.

(2) Benefits

This subsidiary record category shall include payroll related benefits on behalf of employees such as the following:

- Worker's compensation required by law

- Social Security and other payroll taxes

(3) Rents

This subsidiary record category shall include amounts paid for the use of personal operating property. Amounts paid for real property shall be included in Account 6121, Land and Buildings Expense. This category includes payments for operating leases but does not include payments for capital leases.

(ii) This subsidiary record category is applicable only to the Plant Specific Operations Expense accounts. Incidental rents, e.g., short-term rental car expense, shall be categorized as Other Expenses (see paragraph (f) (4) of this section) under the account which reflects the function for which incidental rent was incurred.

(4) Other Expenses

This subsidiary record category shall include costs which cannot be classified to the other subsidiary record categories. Included are material and supplies, including provisioning (note also Account 6512, Provisioning Expense); contracted services; accident and damage payments, insurance premiums; traveling expenses and other miscellaneous costs.

(5) Clearances

This subsidiary record category shall include amounts transferred to Construction accounts (see paragraph 32.2000(c) (2) (iii), Other Plant Specific Operations Expense accounts and/or Account 3100, Accumulated Depreciation (cost of removal: see paragraph 32.2000(g) (1) (iii), as appropriate, from Accounts 6112, Motor Vehicle Expense, 6113, Aircraft Expense, 6114, Special Purpose Vehicles Expense, 6116, Other Work Equipment Expense, 6534, Plant Operations Administration Expense and 6535, Engineering Expense. There shall also be transfers to Construction or other Plant Specific Operations Expense accounts, as appropriate, from Account 6512, Provisioning Expense. With respect to these expenses, companies may establish such clearing accounts as they deem necessary to accomplish substantially the same results, provided that within 30 days of the opening of such accounts, companies shall notify the commission of the nature and purpose thereof. Additional clearing accounts affecting other expense areas may be established with prior approval of the commission. Should companies elect, the initial incurred subsidiary record category identification may be carried through to the final accounts without this commission's approval.

NO, see 10/22/77 Letter to WBI & GTE

(6) Except for companies subject to dual state and federal jurisdiction actual ledger accounts for the expense matrix are not required. However, accounting records underlying the matrix categories shall be maintained in such detail that the total of the amounts distributed and the distribution is readily identified and available for audit and reporting purposes.

(g) Reimbursements

Reimbursements of actual costs incurred in connection with joint operations or projects, repairing plant due to damages by others, and obligations to make changes in telecommunications plant (such as highway relocations), shall be credited to the accounts originally charged.
